Computer Systems Security
ENEE 457 (Fall 2019)

Lecture Information
Lecture: MW 11:00am-12:15pm
EGR 0108
References: Introduction to Computer Security, Goodrich and Tamassia, Addison Wesley, 2011
Class URL: http://www.ece.umd.edu/~danadach/Security_Fall_19/
Instructor:
Dr. Dana Dachman-Soled
Office: 5238 Iribe
Email: danadach@ece.umd.edu
Office Hours:
R 3:30-4:30pm, F 9-10am or by appointment.
TAs:
Daniel Xing
Email: dxing97@umd.edu
Lambros Mertzanis
Email: lambros@terpmail.umd.edu
TA Office Hours:
Daniel: T 11am-12pm Location: 1115 Kim Building
Lambros: M 5-6pm Location: 1115 Kim Building

Important Dates
August 26 Monday First lecture
September 2 Labor Day No Lecture
September 9 Monday Last day to drop course without a “W”
November 27-December 1 Thanksgiving Recess No Lecture
December 9 Monday Last day of class
December 13 Friday Final exam (8:00am-10:00am, in the regular lecture classroom)

If you have a documented disability and wish to discuss academic accommodation with me, please contact me as soon as possible and not later than Septembe9, 2019.
If you are experiencing difficulties in keeping up with the academic demands of this course, contact the Learning Assistance Service, 2201 Shoemaker Building, 301-314-7693. Their educational counselors can help with time management, reading, note-taking and exam preparation skills.

Grading Policy
Programming Projects and Demo 30% (Projects: 5%, 5%, 5%, 5%, 5%, Demo: 5%)
Homework Exercises 10%
Class Exercises 5%
Midterm Exam 25% (Tentative date: Monday, October 7)
Final Exam 30% Fri. Dec. 13, 8am-10pm in our regular classroom

There is an Extra Credit Opportunity which involves presenting a news article that relates to topics covered in class (short, 1-2 minute presentation). If you would like to present, email the instructor by 6pm the evening before class, include a link to the relevant news article and a brief explanation of how the article relates to what is being covered in class.

There will be an additional Extra Credit Opportunity that will be assigned after the midterm exam. This will involve reading a scholarly paper from a list of approved papers and writing a critical summary of the paper. Information will be forthcoming in the second half of the semester.
Exams:

– All exams will be closed book, closed notes, no calculators or PDAs, and please turn off cell phones.
– If you must miss an exam, you need to get permission from Dr. Dachman-Soled at least 48 hours before the exam or have a doctor’s note. In this case, a make-up exam will be given. Otherwise, 0 will be counted as the score for the missed exam.
– If you dispute your score on the midterm exam, you must contact Dr. Dachman-Soled within one week from the date the exam paper is returned. After this period, no changes will be considered.
– If one of the exams is scheduled on a religious holiday that you are compelled to observe and you must make arrangements to take the exam on a different date, please see me about making these arrangements no later than September 9.

Class Exercises:

– We will frequently be doing class exercises in small groups in class, some of which I will collect. The main point of the class exercises is to make sure students are participating and involved in the lecture. I will not necessarily be checking answers for correctness. Think of this as a “class participation” grade.

Projects and Homeworks:

– There will be 5 programming projects and 4 homework assignments this semester. Instructions for completion of the projects/homeworks will be posted on the course webpage and announced in the lecture, at least one week before the due date. Assignments will be submitted online through Canvas. In general, late assignments will not be accepted. The instructor may allow late project or homework submission under extenuating circumstances. In this case documentation such as a doctor’s note will be requested.
– Towards the end of the semester, there will be one Demo with the TA’s, where you will be required to present and answer questions on one of the programming projects. This will count towards 5% of your final grade.
– If you dispute your score on a project or homework, you must contact the TA within one week from the date that your project/homework is officially returned. If the matter remains unsettled, you have one more week to bring the issue to Dr. Dachman-Soled with a written request.
– It is acceptable, and you are encouraged, to discuss the projects/homeworks with others, but you have to do the coding and/or final write-up by yourself (unless it is a group assignment). Both copying code/writeups and allowing others to copy your code/writeups will be considered as academic dishonesty.

Academic dishonesty will not be tolerated. The University Code of Academic Integrity, which can be found at [http://www.inform.umd.edu/CampusInfo/Departments/JPO/](http://www.inform.umd.edu/CampusInfo/Departments/JPO/) prohibits students from committing the following acts of academic dishonesty: cheating, fabrication, facilitating academic dishonesty, and plagiarism. Academic dishonesty in this class includes outright copying on homework; however, discussing homework problems and exchanging tips is permissible and also encouraged. If there are any take-home exams, discussing the material with anyone, inside or outside of the class, is considered academic dishonesty. Instance of academic dishonesty will be referred to the Office of Judicial Programs.
